VO BA HOANG MINH

AI ENGINEER | APPLIED AI, AGENTS & EVALUATION

Ho Chi Minh City, Vietnam | Remote, worldwide | UTC+7
minhhoang250803@gmail.com | +84 902 391 936
github.com/anhminhzui-dev | Portfolio (anhminhzui-dev.github.io) | Research (doi.org/10.5281/zenodo.22675789)

AI engineer and Gnomon founder. Built a paid AI assessment business from scratch, owning product, data, training, inference, retrieval, tool calling, agent harnesses, evaluation and full-stack delivery.

EXPERIENCE

Gnomon | Founder & AI Systems Engineer | 2024 - Present

- Founded Gnomon; owned product strategy, UX, architecture and Claude/Codex-assisted engineering; delivered paid assessments, triaged defects and retained final quality review and client support.
- Designed assessment: source-span extraction, deterministic scoring and abstention on unsupported judgments.
- Built KD-tree exemplar retrieval and a separate LangGraph/SQLite FTS5 rule-retrieval workflow with tenant/role filtering before ranking.
- Led LLM/QLoRA training and profiling on NVIDIA B200 with completion-weighted Triton loss, chunked vocabulary projection and recoverable checkpoints; curated 10,888 training and 578 validation records.
- Delivered React/TypeScript and FastAPI/SQLite software with TOTP MFA and automated tests; directed coding agents using resource-admission, spend/irreversibility and output-hash checks.

FPT Software | Data Science | 2025 - 2026

- Consolidated and cleaned customer/business data; analysed trends, seasonality and anomalies; compared forecasting models.

FPT Education | Lecturer, Applied AI in VFX | 2025 - Present

- Taught paid AI-for-VFX to hundreds of students: Cinema 4D, Blender, After Effects and Unreal Engine; AI tool selection, output evaluation against creative briefs, manual refinement and production handoffs.
- Designed lessons/briefs, critiqued work and mentored portfolios/showreels; supervised business-linked workshops.

FORWARD-DEPLOYED ENGINEERING - VFX & APPLIED AI

OTSU Labs | Applied AI Operations, VFX Production | 2025

- Led AI-assisted production, art direction and shot planning/reviews across 2-3 teams of 3D artists/compositors with Sparta VFX and Sparx supervisors. Developed a studio shader, managed render passes and asset/animation/look-development handoffs, and resolved animation/render/compositing mismatches. OTSU-Cluely partner-project details under NDA.

FPT, "Fragments of the Deep" | Applied AI Operations Lead | 07/2024 - 2025

- Led cross-department AI-assisted production of a UE5 animated short; directed storyboards, cameras and animatics; created characters, procedural underwater/sci-fi environments and a shared asset library; optimised real-time assets and handled ray-traced lighting/colour grading.

Dihaan Media | Applied AI Operations | 2023

- Delivered AI-assisted stage/booth visuals for Sofitel Saigon Plaza with the client team; introduced IES lighting and workflow tools; supported client walkthroughs.

Contract engagements | Applied AI & Pipeline Engineering | 2023 - Present

- Delivered AI-assisted modelling, look development, lighting, rendering, compositing and pipeline work. Contract credits: Supercomp; G5 Games. Project credits: Omachi noodle TVC; Rockstar drink TVC. Additional work: education and OCR book digitisation.

SELECTED ENGINEERING PROJECTS

failclosed-eval | Evaluation-input validation | View

- Built offline checks for missing images, leakage and duplicates: 375/500 ELLIPSE-based payloads admitted; 125 refused. Automated tests and GitHub CI.

policy-deck | Coding-agent policy classification | View

- Classifier evaluation: 8 false positives/0 false negatives on 1,260 fitted cases; 2/0 on 190 separate cases.

relay-gate | Completion-claim detection | View

- Built offline false-completion checks evaluated on MAST and AgentRewardBench.

mcp-trajectory-judge | Tool-trajectory evaluation | View

- Replays synthetic MCP-style tool actions in a deterministic in-memory sandbox to check goal assertions.

Hackathon & competition work | September 2026 | View

- uh-huh voice-agent entry; scored ARC White-Box and Kaggle S6E9 submissions.

PUBLICATIONS & OPEN SOURCE

Constructing Language Judgments | Technical report | View

EleutherAI lm-evaluation-harness | Submitted PR #4115 | View

- Added isolated DummyLM tests for construction, generation/error paths and chat templates.

SKILLS

AI / training: Python, PyTorch, PEFT/QLoRA, multimodal SFT, custom Triton loss tooling.
Retrieval / agents: LangGraph, KD-tree exemplar retrieval, SQLite FTS5, policy-as-code guardrails.
Application / quality: TypeScript, React, FastAPI, SQLite, pytest, GitHub Actions CI.
Languages: Vietnamese - native; English - professional proficiency; Japanese - intermediate.

EDUCATION

FPT University | Bachelor's degree.

Prepared with AI assistance; professional history and contribution attributed to Minh.
